

OUR COMPANY AT A GLANCE

(Information reflects FY2015 data)

As a global leader in medical technology, services and solutions, Medtronic improves the health and lives of millions of people each year. We're using our deep clinical, therapeutic and economic expertise to help address the complex challenges faced by healthcare systems today. Challenges like rising costs, an aging population, and the burden of chronic disease. But no one can do it alone. That's why we're committed to working with new partners, in new ways to take healthcare **Further, Together.**

HISTORY

Earl Bakken and his brother-in-law, Palmer Hermundslie, founded Medtronic in 1949 as a medical repair company. They soon began collaborating with physicians to develop life-changing medical devices, including the first wearable, battery-operated pacemaker. Today, we're among the world's largest medical technology, services and solutions companies.

MISSION

To contribute to human welfare by the application of biomedical engineering in the research, design, manufacture, and sale of instruments or appliances that **alleviate pain, restore health, and extend life.**

INNOVATION

PRODUCTS used for

- Heart and vascular disease
- Neurological disorders and chronic pain
- Spinal and orthopedic conditions
- Diabetes
- Urologic, urogynecologic, and digestive disorders
- Ear, nose, and throat disorders
- Surgical navigation
- Hemostatic sealing and dissection
- Patient monitoring and diagnostics

CORE TECHNOLOGIES

- Electrical stimulation
- Implantable mechanical devices
- Powered and advanced energy instruments
- Surgical navigation and imaging
- Targeted drug and biologics delivery

SERVICES

- Care Management Services
- Hospital solutions and efficiency
